Skills

- Python
- Java

Projects

- **Online food ordering system**
 - Enable users to browse menus, place orders, and make payments online for food delivery or pickup
 - User Roles: Includes customers, restaurant staff, and delivery personnel
 - Core Features: Menu browsing, order placement, real-time order tracking, payment processing, and user account management.
 - System Components: Frontend for user interaction, backend for processing orders, and database for storing menu items, orders, and user information.
- **Break-out-game**
 - Break all the bricks using a paddle to bounce a ball while preventing the ball from falling past the paddle
 - Player Controls: Paddle movement is controlled by keyboard or mouse.
 - Core Elements: Includes a paddle, ball, bricks, and potential power-ups.
 - Game Mechanics: Involves precise collision detection and physics for realistic ball movement.
 - Game Mechanics: Involves precise collision detection and physics for realistic ball movement.

Certificates

- I have successfully completed Infosys internship programing 4.0
- I have successfully completed digital skills readiness program course completion certificate in Wipro
- Certified in The Joy of Computing Using Python from NPTEL
Roll no:-NPTEL23c109s33633980
- Certified in Programming in Java from Nptel
Roll no:- NPTEL23CS49S53643509
- Certified in cognifyz technologies internship based python development
Intern l'd is CTI/A1/c3529

Achievements & Awards

- Science Olympiad foundation NCO 2017 to 2018 Roll No: AP1837-09-X-002 STATE: ANDHRA PRADESH SCHOOL:-BHASHYAM RESIDENTIAL HIGH SCHOOL CITY: GUNTUR

Extracurricular Activity

- Kho kho
- Badminton

Languages

- Telugu
- English

Internship

-

1. Online food ordering system

Developed a comprehensive web-based food ordering system to facilitate online food orders for restaurants

- Utilized Python, Django, HTML, CSS, JavaScript, and SQLite/MySQL for the backend and frontend development
- User Authentication: Implemented secure user login, registration, and profile management using Django's built-in authentication system
- Menu Management: Developed an intuitive interface for restaurant managers to add, update, and delete menu items with corresponding images and descriptions.
- Order Processing: Created a streamlined order placement process including cart functionality, order confirmation, and payment integration
- Admin Dashboard: Designed an admin panel for monitoring orders, managing users, and generating sales reports.
- System Components: Frontend for user interaction, backend for processing orders, and database for storing menu items, orders, and user information.
